- **Do not** re-upload anything included in the download.
- **Do not** release this in an unlocked format.
- **Do not** attempt to claim anything included in the download as your own.
- **Do not** convert anything in the download to another game.

Commercial Fees

Since September of 2021, I have been charging a small commercial fee that covers all my parts. However, some people seem to be offended by this and others choose to just not pay it despite it saying to message me in the TOS. These fees are not meant to restrict people from using my parts, but rather to compensate for my time and effort and to allow people who release vehicles for free to keep them free. If you plan to use any of my parts made after June 15th, 2021 (If you're not sure if you need to do this, read the TOS for that part) DM on Discord or open a ticket in my server to pay the small commercial fee. Paying the fee allows my parts to stay public and not hidden behind a pay wall.
