2013 Chevrolet Caprice PPV – Los Santos Police Department – Slicktop
for Grand Theft Auto V

Discuss the mod and stay updated on modding-forum.com.

Version	1.0C
Optimized for	Police3
Lighting equipment	Federal Signal Cuda TriOptic
ELS Support	ELS-V 1.05
Multiple Liveries	Yes

Credits
- Original vehicle model is Pontiac G8 from Forza, edited into the 2013 Chevrolet Caprice PPV by Kane104. Model assembled with contributions from EVI in the form of a scratch modeled front bumper and bonnet, whilst all other model edits such as the rear end and interior were performed by Kane104.
- Interior console, LoJack, gun racks, antennas, Federal Signal ES100 siren speaker, template, rims, interior texture edits by Kane104.
- Dirtmap, liveries, LSPD MDCS texture, Federal Signal Cuda TriOptic, ELS setup, and configuration files by Cj24.
- Spotlights and M4 rifle by Ridgerunner.
- Federal Signal Smart Siren controller (mapped to textures by Ridgerunner), Motorola radio, shotgun, Dell notebook, tyre textures and Setina partition by EVI.

Terms of use
You may:
- Replace or edit textures for personal use.
- Create and redistribute liveries of your own using the provided template.

You may not:
- Circumvent any protecting measures to edit models.
- Use any of the work included in this archive for your own financial gain.
- Redistribute this archive and its contents on any other website other than modding-forum.com without permission.

Installation
If possible, use OpenIV's mods folder instead of replacing original files! For more detailed installation instructions for vehicle mods, review this guide.

Use OpenIV to add all files in the Vehicle Files folder to `\update\x64\dlcpacks\patchday13ng\dlc.rpf\x64\levels\gta5\vehicles.rpf`.

Open `Config Files\carvariations_meta.txt` with any text editor and copy the complete content. Export `\update\x64\dlcpacks\mpchristmas2\dlc.rpf\common\data\carvariations.meta` using OpenIV, open it with any text editor, create a new line between `</item>` and `</variationData>` and before the first paste the previously copied content. Replace the original `carvariations.meta` with the edited one.

Copy the `Config Files\police3.xml` file and paste it into `\ELS\pack_default`. If you use a custom pack, add it to its folder.

To install the car in a different slot, change the names of the `.yft`, `.ytd` and `.xml` files, the `<modelName>` value of the carvariations.meta settings and the `<modelName>` and `<txdName>` values of the vehicles.meta settings respectively.

Optionally, if you don't use any light enhancing mods, replace `\update\update.rpf\common\data\visualsettings.dat` with `Config Files\visualsettings.dat` using OpenIV.

Notes
This mod requires ELS-V (Emergency Light System) version 1.05 to work properly.

Files included
- police3.yft
- police3.ytd
- police3_hi.yft
- police3+hi.ytd
- carvariations_meta.txt
